2.1 Zeroing	2

Chapter 1 Introduction

HIKMICRO THUNDER ZOOM 2.0 series is equipped with high-sensitivity IR detector, and adopts advanced thermal imaging technology, to get clear view in poor visibility or dark environment.

It helps to view the target and measure the distance. It can aim at the moving target and meet the outdoor condition. The device can be widely used in searching and rescuing, hiking, travel, etc.

This document introduces new features and optimizations in V5.5.68 of the products.

Version Information

Item	Description
Firmware Version	V5.5.68 build 231108
Models	TH50Z 2.0 TQ60Z 2.0
Mobile Client	HIKMICRO Sight, latest version

Chapter 2 Optimizations

HIKMICRO THUNDER ZOOM 2.0 series has been optimized to improve your experience.

2.1 Zeroing

- 1) Support **Separate Zeroing** mode and **One-Time Zeroing** mode.

Separate Zeroing

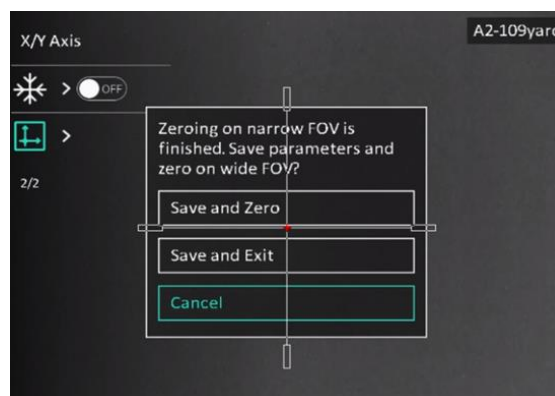

One-Time Zeroing

Note

1. In One-time Zeroing, it needs to switch to the narrow FOV (which also means big focal lens) to do the calibration, otherwise you can't zero or you can't enter into Zeroing menu.

- 2) In **Separate Zeroing**, it supports the quick switch to the wide FOV to do the calibration after finishing the zeroing of the narrow FOV.
