1 Overview

HIKMICRO HABROK 4K 2.0 series is a powerful and innovative digital and thermal multi-spectrum binocular designed for all-day use. It can be mainly applied in forest & field hunting, birding, animal searching, adventuring, and rescuing in various weather conditions.

- Thermal detector for quick scanning and searching.
- Advanced 4K digital detector with 5.5× to 22× @60 mm lens for excellent detail recognition capability in true living color, especially at low-light conditions.
- Built-in IR presents classic black/white images in total darkness.
- Precise built-in laser rangefinder capable of measuring distance up to 1,000 m.

1.1 Main Function

- **HSIS (HIKMICRO Shutterless Image System):** The device supports shutterless technology, it is a dynamic learning process without image quality loss. This eliminates the need for periodic calibration pauses, ensuring you never miss a critical moment in the field.
- **Digital Zoom with Image Stabilization:** Featured with image stabilization algorithm in thermal and optical channel, the device presents steady images and avoids dazzling or blurring your vision, especially in low-light conditions.
- **Laser Ranging:** Built-in laser range finder provides an accurate distance between the target and the observation position.
- **Video and Audio Recording:** The built-in memory module supports video recording. Audio function allows you to record the sound during video recording.
- **Local Album:** Captured images and recorded videos are stored in the device, and you can view the files in the local albums.
- **Compass:** The device can detect the azimuth angle and elevation angle and show the direction information on the screen.
- **App Connection:** The device can capture snapshots, record videos, and set parameters by HIKMICRO Sight app after being connected to your phone via hotspot.

1.2 Appearance

Note

- The appearance may vary according to different models. Please take the actual product for reference.
- Pictures in this manual are for illustration purpose only. Please take the actual product for reference.

Figure 1-1 Appearance

Multi-Spectrum Binocular User Manual

Table 1-1 Description of Buttons and Components

No.	Component	Description
1 & 2	Eyepiece	The piece placed closest to the eye to view the target.
3 & 5	IPD (Interpupillary Distance) Adjustment Ring	To move the ring farther or closer to each other to adjust the interpupillary distance.
4	Focus Ring	Adjusts focus to obtain clear targets.
6	T/D (Thermal/Digital) Selector	To toggle the T/D selector left for digital view or right for thermal view.
7	Buttons	To set functions and parameters.
8	Removable IR Illuminator	Helps to view the target clearly in the dark environment. The illuminator can be changed with another compatible illuminator for better viewing experience.
9	Laser Rangefinder	Measures the distance to the target with laser.
10	Thermal Lens	For thermal imaging.
11	Digital Lens	For digital imaging.
12	Type-C Interface	To connect the device to power supply or transmit data with a type-C cable.
13	Charging Status Indicator	Indicates the charging status of the device. <ul style="list-style-type: none"> ● Flashing Red & Green: Error occurred. ● Solid Red: Charging. ● Solid Green: Fully charged.
14 & 21	Battery Compartment	For holding the batteries.
15 & 22	Neck Strap Attachment Point	Attaches the neck strap.
16 & 23	Diopter Adjustment Ring	Adjusts the dioptric setting.
17	Tripod Adapter Socket	Attaches the tripod adapter.
18	Microphone	To record audio.
19 & 20	Eyecup	<ul style="list-style-type: none"> ● Unfoldable Eyecup Part (19): cannot be folded, forcefully folding may cause sudden elastic rebound, posing a risk of injury. ● Foldable Eyecup Part (20): can be folded if wearing glasses.

Button Description

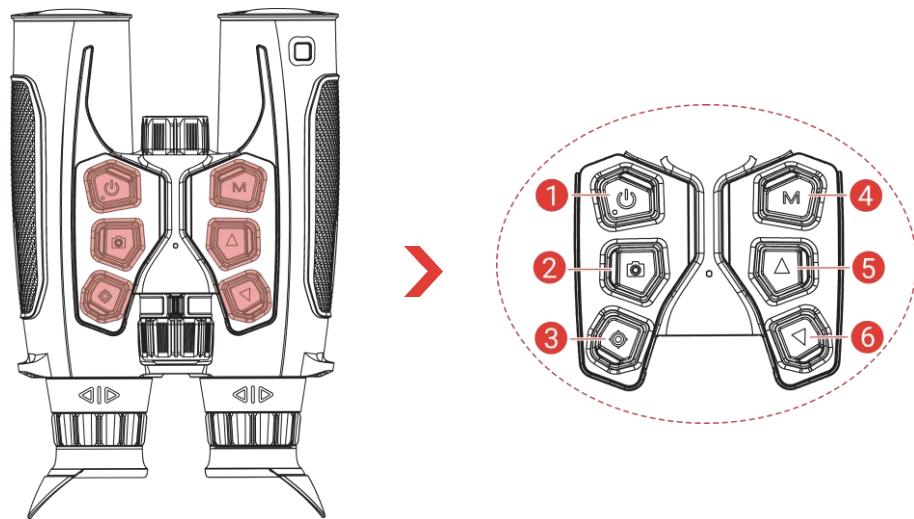

Figure 1-2 Button

Table 1-2 Button Description

No.	Icon	Button	Function
1		Power	<ul style="list-style-type: none"> ● Press: Standby mode/Wake up device. ● Hold: Power on/off.
2		Capture	<ul style="list-style-type: none"> ● Press: Capture snapshots. ● Hold: Start/Stop recording videos.
3		Measure	<p>Non-Menu Mode:</p> <ul style="list-style-type: none"> ● Press: Turn on laser ranging. ● Double Press: Turn off laser ranging. ● Hold: Enter the menu. <p>Menu Mode:</p> <ul style="list-style-type: none"> ● Press: Confirm/Set parameters. ● Hold: Save and exit menu.
4		Mode	<p>Thermal View:</p> <ul style="list-style-type: none"> ● Press: Switch palettes. ● Hold: Switch scene modes. <p>Digital View:</p> <ul style="list-style-type: none"> ● Press: Switch yellow/green/black & white mode in night mode. ● Hold: Switch day/night/auto mode.
5		Up	<p>Non-Menu Mode:</p> <ul style="list-style-type: none"> ● Press: Digital zoom in. ● Hold: Correct non-uniformity of display (FFC).

			Menu Mode: Move up.
6		Down	<p>Non-Menu Mode:</p> <ul style="list-style-type: none">● Press: Digital zoom out.● Hold: Turn on/off PIP (Picture-in-Picture). <p>Menu Mode: Move down.</p>

Note

- The power indicator stays solid red when the device is on.
- Toggle the T/D selector left for digital view or right for thermal view before using the mode key.
- When the auto screen off function is enabled, if you press  to enter standby mode, you can also tilt or rotate the device to wake up the device. Refer to *Auto Screen Off* for detailed operation.

2 Preparation

2.1 Install Battery

2.1.1 Battery Instruction

- Remove the batteries if the device is not used for a long time.
- The external rechargeable battery type is 18650, and the battery size should be 19 mm × 70 mm. The rated voltage is 3.635 VDC, and the battery capacity is 3300 mAh.
- Charge the device for more than 5 hours before first use.
- To ensure better conductivity, if the battery compartment covers get dirty, use a clean cloth to wipe the thread.
- To ensure proper operation of the device, please install two batteries in the battery compartments.

2.1.2 Battery Installation

Insert the batteries into the battery compartments.

Steps

1. Slide to unlock and open the battery compartment covers.

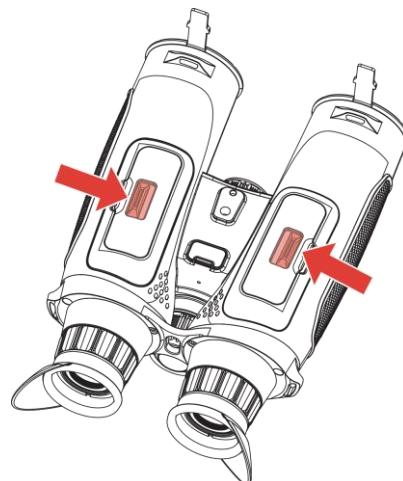

Figure 2-1 Open the Covers

2. Insert batteries into the battery compartments as the positive and negative marks indicate.

Figure 2-2 Install the Batteries

3. Close the battery compartment covers and slide to lock them.

Figure 2-3 Close the Covers

2.2 Cable Connection

Connect the device and power adapter with a type-C cable to charge the device. Alternatively, connect the device and PC to export files.

Steps

1. Lift the type-C interface cover.
2. Connect the device and power adapter with a type-C cable to charge the device.

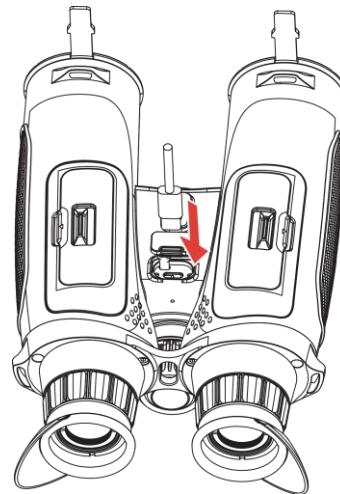

Figure 2-4 Cable Connection

Note

- Please charge the device after the batteries are installed in the battery compartments of the device.
- Make sure the battery temperature is between 0°C to 55°C (32°F to 131°F) when charging.
- You can use battery charger to charge the batteries.

2.3

Change Illuminator (Optional)

The IR illuminator can be changed with other compatible illuminator for better viewing experience.

Steps

1. Rotate the IR illuminator counterclockwise to remove the IR illuminator.

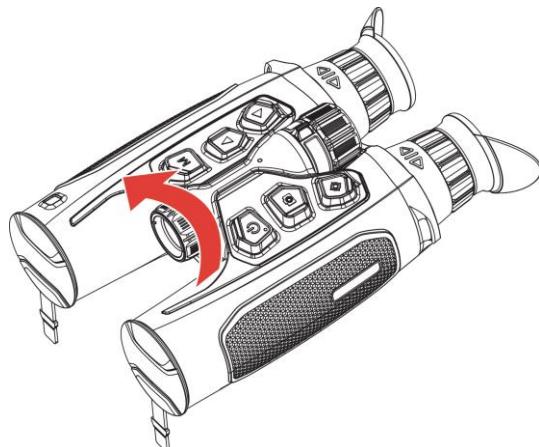

Figure 2-5 Remove the IR Illuminator

2. Align the replaceable illuminator with the interface on the device and insert it, then rotate the illuminator clockwise to secure the illuminator.

Figure 2-6 Mount the Illuminator

Note

Please make sure the illuminator is vertically aligned with the interface on the device before screwing it in; otherwise, the installation may fail.

2.4 Attach Neck Strap

Steps

1. Thread one end of the neck strap through a neck strap attachment point.

Figure 2-7 Thread Neck Strap through Attachment Point

2. Thread the neck strap through the strap buckle and fasten the neck strap, as shown in the picture.

Figure 2-8 Thread Neck Strap through Strap Buckle

3. Thread the neck strap through the strap keeper.

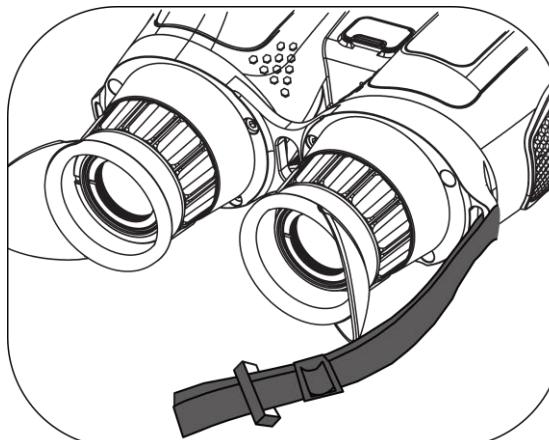

Figure 2-9 Thread Neck Strap through Strap Keeper

4. Repeat the above steps to attach the other end, and adjust the length of neck strap as needed.

2.5 Attach Tripod Adapter

Steps

1. Align the tripod adapter with the socket on the device, and insert the location column (1) to the location point (2).

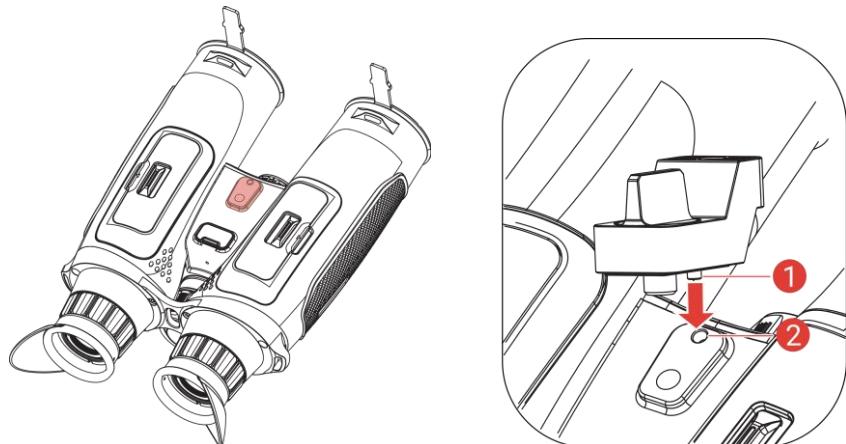

Figure 2-10 Insert the Column

2. Rotate the tripod adapter screw clockwise to fix the tripod adapter.

Figure 2-11 Rotate the Screw

2.6 Power On/Off

Power On

When the device is connected to cable or the battery is enough, hold  to power on the device.

Power Off

When the device is turned on, hold  to power off the device.

Note

- Power-off countdown will appear when you power off the device. You can press any key to interrupt the countdown and cancel the power-off.
- Automatic low battery power-off cannot be canceled.

Auto Power Off

You can set the auto power off time for your device.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  or  to select the auto power off time as needed, and press  to confirm.
4. Hold  to save and exit.

Note

- See the battery icon for the battery status.  means the battery is fully charged,  means that the battery is low, and  means the battery charging is abnormal.
- When the low power note shows, charge the battery.
- The auto power off takes effect only when you don't operate the device and the device isn't connected with HIKMICRO Sight app at the same time.
- The auto power off countdown will start again when the device reenters standby mode, or the device is restarted.

2.7 Auto Screen Off

Auto screen off function darkens the screen to save energy and increase battery time.

Steps

1. Enable auto screen off.
 - 1) Hold  to show the menu.
 - 2) Go to  **Advanced Settings**, and press  or  to select .
 - 3) Press  to enable auto screen off.
 - 4) Hold  to save settings and exit.
2. Enter standby mode.

You can do one of the following methods to enter the standby mode when the display is turned on:

- Tilt the device downwards from 70° to 90°.
- Rotate the device horizontally from 75° to 90°.
- Keep the device still and do not move it for 5 minutes.

3. Wake up device.

You can do one of the following methods to wake up the device when the display is turned off:

- Tilt the device downwards from 0° to 60° or upwards from 0° to 90°.
- Rotate the device horizontally from 0° to 70°.
- Press  to wake up the device.

Note

After enabling the auto screen off, when you enter the menu, the auto screen off does not take effect until you exit the menu.

2.8 Menu Description

In the live view interface, hold  to show the menu.

Figure 2-12 Device Menu (Round Screen Style)

Figure 2-13 Device Menu (Square Screen Style)

- Press  to move the cursor up.
- Press  to move the cursor down.
- Press  to confirm and hold it to exit the menu.

2.9 App Connection

Connect the device to the HIKMICRO Sight app via hotspot, then you can capture picture, record video, or configure parameters on your phone.

Before You Start

Confirm **Remote Access** is enabled on the device. Hold  to enter the menu, and go to **Advanced Settings > Remote Access**.

Steps

1. Search the HIKMICRO Sight on App Store (iOS System) or Google Play™ (Android System) to download it, or scan the QR code to download and install the app.

Android System

iOS System

2. Hold  to show the menu.
3. Go to  **Advanced Settings**, and press  or  to select .
4. Press  to enter the setting interface.
5. Press  or  to select **Hotspot_5G** or **Hotspot_2.4G**, and then the hotspot of 5 GHz or 2.4 GHz is enabled.
 - Use 2.4 GHz if your smartphone does not support 5 GHz.
 - 5 GHz is recommended for small-range scenarios within 5 m, such as mounting device on the vehicle. Otherwise, use 2.4 GHz.
6. Turn on the WLAN of your phone and connect to the hotspot.
 - Hotspot Name: HIKMICRO_Serial No.
 - Hotspot Password: Go to **Hotspot** in the menu to check the password.
7. Open the app, and confirm the connection PIN code on the device to connect your phone with the device. You can view the interface of device on your phone.

Note

- When the device is connected to your phone, you can change the hotspot password via the HIKMICRO Sight app.
- The hotspot password will be updated when you reset the device (refer to *Reset Device*). In this case, you need to reconnect to the device hotspot.

2.10 Firmware Status

2.10.1 Check Firmware Status

Steps

1. Open the HIKMICRO Sight and connect your device to the app.
2. Check if there is an upgrade prompt on the device management interface. If there is no upgrade prompt, the firmware is the latest version. Otherwise, the firmware is not the latest version.

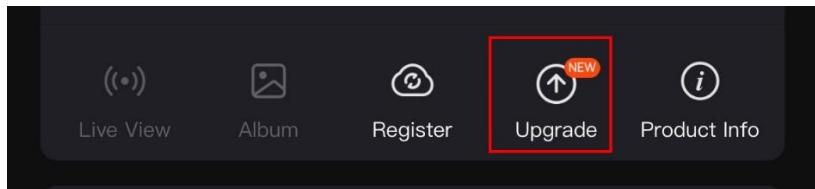

Figure 2-14 Check Firmware Status

3. (Optional) If the firmware is not the latest version, upgrade the device. See *Upgrade Device*.

2.10.2 Upgrade Device

Upgrade Device via HIKMICRO Sight

Steps

1. Open HIKMICRO Sight app and connect your device to the app.
2. Tap the upgrade prompt to enter the firmware upgrade interface.
3. Tap **Upgrade** to start upgrade.

Note

The upgrading operation may vary due to app updates. Please take the actual app version for reference.

Upgrade Device via PC

Before You Start

Please get the upgrade package first.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to select **USB Flash Drive**.
5. Connect the device to your PC with cable.
6. Open the detected disk, copy the upgrade file and paste it to the root directory of the device.
7. Disconnect the device from your PC.
8. Reboot the device, and the device upgrades automatically. The upgrading process will be displayed in the main interface.

Caution

During the upgrade package transmission, make sure the device is connected to your PC. Otherwise, it may cause unnecessary upgrade failure, firmware damage, etc.

3 Image Settings

You can set palettes, brightness, scenes, FFC (flat field correction), and DPC (defective pixel correction) for better image display.

3.1 Adjust Device

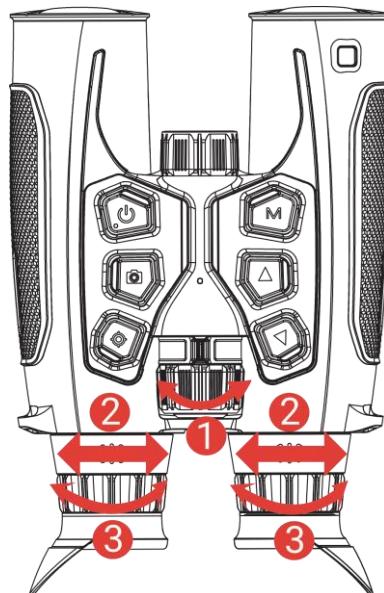

Figure 3-1 Adjust Device

①Adjust Focus: Slightly rotate the focus ring to adjust the focus of the objective lens.

Note

DO NOT touch the lens directly with your finger, or place any sharp objects near them.

②Adjust Interpupillary Distance: Adjust the interpupillary distance by moving the eyepieces farther or closer to each other.

③Adjust Diopter: Make sure the eyepiece covers your eye and aim at the target. Adjust the diopter adjustment ring until the OSD text or image is clear.

Note

When adjusting diopter, DO NOT touch the surface of lens to avoid smearing the lens.

3.2 Adjust Brightness

You can adjust the brightness in the menu.

Steps

1. Hold  to show the menu.
2. Press  or  to select  and press  to confirm.
3. Press  or  to switch brightness adjustment mode. **Auto** and **Manual** are selectable.
 - **Auto**: Adjust the brightness automatically according to ambient brightness.
 - **Manual**: Adjust the brightness manually. Press  and press  or  to adjust brightness.
4. Hold  to save and exit.

3.3 Adjust Contrast

Steps

1. Hold  to show the menu.
2. Press  or  to select  and press  to confirm.
3. Press  or  to adjust contrast.
4. Hold  to save and exit.

3.4 Adjust Tone

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to confirm, and press  or  to select a tone. **Warm** and **Cold** can be selected.
4. Hold  to save and exit.

Figure 3-2 Adjust Tone

3.5 Adjust Sharpness

Steps

1. Hold  to show the menu.
2. Press  or  to select  and press  to confirm.
3. Press  or  to adjust sharpness.
4. Hold  to save and exit.

Figure 3-3 Sharpness Adjustment Comparison

3.6 Select Scene

You can select proper scene according to actual using scene to improve the display effect. In the thermal view, hold **M** to switch scene mode.

- **Observation:** Observation mode is recommended in normal scene.
- **Detection:** Detection mode is recommended in hunting environment.

3.7 Set Palettes

Before You Start

Toggle the T/D selector right for thermal view before switching the palettes in the live view interface.

You can select different palettes to display the same scene in different effects.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter the palettes setting interface.
4. Press  or  to select the palettes required, and press  to enable them.

Note

At least one palette should be enabled.

5. Hold  to save the settings and exit.
6. Press **M** in live view interface of thermal channel to switch the selected palettes.

White Hot

The hot part is light-colored in view. The higher the temperature is, the lighter the color is.

Black Hot

The hot part is black-colored in view. The higher the temperature is, the darker the color is.

Red Hot

The hot part is red-colored in view. The higher the temperature is, the redder the color is.

Fusion

From high temperature to low temperature, the image is colored in from white, yellow, red, pink to purple.

Red Monochrome

The whole image is red colored. The higher the temperature is, the lighter the color is.

Green Monochrome

The whole image is green colored. The higher the temperature is, the lighter the color is.

3.8 Set Display Mode

Before You Start

Toggle the T/D selector left for digital view before switching the display mode in the live view interface.

You can select different display modes in the optical channel. Hold **M** in the live view interface to switch display modes in the optical channel. Day, night, and auto modes are selectable. In the night mode, press **M** to switch yellow/green/black & white mode.

-  Day Mode: You can use this mode at daytime and in bright environment. In day mode, the IR light is off automatically.

-  Night Mode
-  Black & White Mode: You can use this mode at night. In night mode, the IR light is on automatically.

- Green mode: It's a night vision mode. You can use this mode according to your personal preference.

- Yellow mode: It's a night vision mode. You can use this mode according to your personal preference.

- Auto Mode: The day mode and night mode switch automatically according to the ambient brightness.

3.9 Set Picture in Picture Mode

Hold ∇ in live view to enable PIP, and hold ∇ again to exit PIP. The image center is displayed in upper middle of the interface.

Figure 3-4 Set PIP Mode

Note

- The PIP view temporarily displays the zoom ratio when adjusting the digital zoom of the device.
- If the PIP function is enabled, only the PIP view zooms when adjusting the digital zoom ratio.
- If the PIP function is enabled in thermal mode, press M to switch PIP view between current palette and optical mode; if the PIP function is enabled in optical mode, press M to switch PIP view among the selected palettes and optical mode.

3.10 Adjust Digital Zoom

You can zoom in and out the image by using this function. Press Δ or ∇ in the live view interface to switch the digital zoom ratio.

Steps

1. Hold \odot to show the menu.
2. Go to  **Advanced Settings**, and press Δ or ∇ to select .
3. Press \odot to enter the setting interface, and press Δ or ∇ to select a zoom mode.
 - **Multiple:** The digital zoom ratio can be set to preset options such as 1x, 2x, 4x, etc.

- **Continuous:** The actual zoom ratio changes by the zoom step you set.
 - 1) Press \triangle or ∇ to select .
 - 2) Press  to enter the setting interface, and press \triangle or ∇ to set zoom step.
 4. Hold  to save settings and exit.
 5. In the live view interface, press \triangle or ∇ to switch the digital zoom of the device.

Note

- When switching the digital zoom ratio, the left interface displays the actual magnification (Actual Magnification = Lens Optical Magnification \times Digital Zoom Ratio). For example, the lens optical magnification is 2.8 \times and the digital zoom ratio is 2 \times , and the actual magnification is 5.6 \times .
- The zoom ratio may vary according to different models. Please take the actual product for reference.

3.11

Flat Field Correction

The device supports HSIS, and you can also correct non-uniformity of display manually when necessary. Hold ∇ in the live view to correct non-uniformity of display.

3.12

Correct Defective Pixel

The device can correct the defective pixels on the screen which are not performed as expected.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press \triangle or ∇ to select .
3. Press  to enter DPC configuration interface.
4. Press  to select **X** or **Y Axis**. If you select **X** axis, the cursor moves left and right; if you select **Y** axis, the cursor moves up and down.
5. Press \triangle or ∇ to set the coordinates until the cursor reaches the defective pixel.

6. Press **M** twice to correct the dead pixel.

7. Hold  to save the settings and exit.

Figure 3-5 Correct Defective Pixel

Note

- The selected defective pixel can be magnified and displayed on the bottom right of the interface.
- If the screen OSD blocks the defective pixel, move the cursor to reach the defective pixel, then the device performs mirror display automatically.

3.13 Set Infrared Light

The infrared light helps to view targets clearly in dark environment. The infrared light only works in night mode, auto mode or when the environment is dark. In other modes, the infrared light does not take effect.

Steps

1. Hold  to show the menu.
2. Press  or  to select  and press  to confirm.
3. Press  or  to select the light level or set smart IR.

Note

The image might be overexposed when the environment is too bright. The smart IR function adjusts the overexposed images by controlling infrared light intensity, so as to improve the image effect in night mode and dark environment.

4. Hold  to save settings and exit.

Note

- Infrared light cannot be turned on if the battery is low.
- The infrared light is off in the thermal mode or standby mode.

4 Measure Distance

The device can detect the distance between the target and the observation position with laser.

Before You Start

When measuring the distance, keep the hand and the position steady. Otherwise, the accuracy may be affected.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to go to the measurement interface. Go to  to select a laser ranging mode and press  to confirm. **Once** and **Continuous** are selectable.
 - **Continuous** means measuring the distance continuously, and the measurement duration can be selected. The measurement result will be refreshed every second.
 - **Once** means measuring the distance once.
4. (Optional) THD (True Horizontal Distance) can also be displayed on the live view interface when performing laser ranging. Select  and press  to enable the horizontal distance.
5. Hold  to save the settings and return to the live view interface.
6. Press  in the live view interface to turn on laser ranging, and aim the cursor at the target and press  again to measure the target distance.

Note

- Double press  in the live view interface to turn off laser ranging.
- Laser ranging cannot be enabled when device battery is low.

Result

The distance measurement result is displayed at the upper center of the image.

Figure 4-1 Laser Ranging Result

- When THD is enabled, the straight-line distance is displayed first, followed by the THD. As shown in the figure above, **28 m** is the straight-line distance and **26 m** is the THD.
- The ranging result will be displayed as "000" if laser ranging fails.

Caution

The laser radiation emitted from the device can cause eye injuries, burning of skin or inflammable substances. Before enabling the laser ranging function, make sure no human or inflammable substances are in front of the laser rangefinder.

5

Ballistic Calculation for Hunting

The built-in ballistic calculator assists traditional scopes without ballistic calculation capability by computing the required clicks for precise aiming. Multiple parameters are used in calculation to ensure precision and flexibility of use.

Before You Start

Make sure you have finished zeroing on scope.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select . Press  to enter the setting interface.
3. Select **Ballistic Calculation** and press  to enable this function.
4. Press  to select the **Ballistic Profile**.
5. Press  or  to select the following parameters, and press  to set or input the data.
 - Drag Model: Set the bullet-specific drag model, e.g. G1, G7, and GS.
 - Unit: Set this according to your preference for drop distance and measurement.
 - Initial Velocity: The velocity varies in different conditions.
 - Altitude: Set this to your normal altitude.
 - Temperature: Set this to your normal temperature.
 - Ballistic Coefficient: The measure of its ability to overcome air resistance.
 - Sight Height: The distance between the bore and the center of the lens.
 - Zero Range: The distance at which the scope is zeroed.
6. Press  to switch digit, and press  or  to change the number.
7. Hold  to save and exit.
8. Press  to turn on laser ranging, aim the cursor at the target, and press  again to measure the target distance. The screen will display the recommended aiming point and the drop distance in the upper right corner of the interface.
9. (Optional) To adjust the distance, repeat the above step.

Note

- The more parameters you specify, the more accurate the recommended aiming point will be.
- The drop distance is related to the input parameters. Please refer to the actual situation.
- Continuous laser ranging is not available when enabling ballistic calculation.

6 General Settings

6.1 Set OSD

This function can display or hide the OSD information on the live view interface.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter OSD setting interface.
4. Press  or  to select the Time, Date, or OSD, and press  to turn on or turn off the selected OSD information.
5. Hold  to save and exit.

Note

If you turn off OSD, all OSD information on the live view will not be displayed.

6.2 Set Screen Style

You can select screen style according to your preference.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to confirm. Press  or  to select screen style modes. **Round** and **square** are selectable.
4. Hold  to save according to the prompt. The device will be rebooted.

6.3 Set Brand Logo

You can add brand logo to the live view interface, snapshots, and videos.

Steps

1. Hold  to show the menu.

2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable or disable **Brand Logo**.
4. Hold  to save the settings and exit.

Result

The brand logo is displayed at the bottom left of the image.

6.4 Burning Prevention

Avoid direct sunlight and enable the burning prevention function to reduce the risk of sensor damage from the heat.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable or disable the **Burn Prevention** function.
4. Hold  to save settings and exit.

6.5 Hot Tracking

The device can detect the highest temperature spot in the scene and mark it on display.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable the function and mark the spot of highest temperature.
4. Hold  to save settings and exit.

Result

When the function is enabled,  displays in the spot of highest temperature. When the scene changes, the  moves.

Figure 6-1 Hot Tracking

6.6 Capture and Video

6.6.1 Capture Picture

In the live view interface, press  to capture picture.

Note

- When capturing succeeds, the image freezes for a second and a prompt shows on the display.
- For exporting pictures, refer to [*Export Files*](#).

6.6.2 Set Audio

If you turn on the audio function, the sound will be recorded with the video. When there is too loud noise in the video, you can turn off this function.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable or disable this function.
4. Hold  to save and exit.

6.6.3 Record Video

Steps

1. In the live view interface, hold  to start recording.

Figure 6-2 Start Recording

The image displays the information of recording time.

2. Hold  again to stop recording.

6.6.4 View Local Album

Captured images and recorded videos are automatically stored in the device, and you can view the files in local albums.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .

Note

The albums are automatically created and named by year + month. The local pictures and videos of a certain month are stored in the corresponding album. For example, the pictures and videos of October in 2025 are saved in the album named 202510.

3. Press  or  to select the album storing the files, and press  to enter the selected album.
4. Press  or  to select a file to view.
5. Press  to view the selected file and relevant information.

Note

- Files are arranged in chronological order, with the most recent at the top. If you fail to find the most recently taken snapshots or videos,

please check the time and date settings of your device. When you view files, you can switch to other files by pressing \triangle or ∇ .

- When you are viewing files, you can hold ∇ to turn to next page, and hold \triangle to go back to previous page.
- When you are viewing videos, you can press  to play or stop the video.
- For deleting an album or a file, you can hold M to call the dialogue box, and delete the album or file according to the prompt.

6.7 Export Files

6.7.1 Export Files via HIKMICRO Sight

You can access device albums and export files to your phone via HIKMICRO Sight.

Before You Start

Install HIKMICRO Sight on your mobile phone.

Steps

1. Open HIKMICRO Sight and connect your device to the app. See *App Connection*.
2. Tap **Media** to access device albums.

Figure 6-3 Access Device Albums

3. Tap **Local** or **Device** to view the photos and videos.
 - **Local**: You can view the files captured on app.
 - **Device**: You can view the files of the current device.

Note

The photos or videos may not show in **Device**. Please pull down to refresh the page.

4. Tap to select a file, and tap **Download** to export the file to your local phone albums.

Figure 6-4 Export Files

Note

- Go to **Me** -> **About** -> **User Manual** on the app to see more detailed operations.
- You can also access device albums by tapping bottom left icon in the live view interface.
- The exporting operation may vary due to app updates. Please take the actual app version for reference.

6.7.2 Export Files via PC

This function is used to export recorded videos and captured pictures.

Before You Start

Make sure the device is turned on when connecting the cable.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to select **USB Flash Drive**.
5. Connect the device and PC with cable.

Note

Make sure the device is turned on when connecting the cable.

6. Open computer disk and select the disk of device. Go to the DCIM folder and find the folder named after the capture year and month. For example, if you capture a picture or record a video on October 2025, go to **DCIM -> 202510** to find the picture or video.
7. Select and copy the files to PC.
8. Disconnect the device from your PC.

Note

- The device displays images when you connect it to PC. But functions such as recording, capturing and hotspot are disabled.
- When you connect the device to PC for the first time, it installs the drive program automatically.

6.8 Direction Display

6.8.1 Switch on Compass

Equipped with a compass, the device can display its direction on the live image, captured images, and recorded videos.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable the function.
4. Follow the pop-up instructions to calibrate the compass. See **Calibrate Compass** for more information.

Result

After successful calibration, you can see the azimuth (AZM) angle and elevation (EL) angle displayed on the screen. It is recommended to read the information when you lay the device horizontally.

To increase the direction accuracy, you can set the magnetic declination correction. See **Magnetic Declination Correction** for instructions.

6.8.2 Calibrate Compass

Compass calibration is a must for correction direction display. You need to calibrate the compass when you enable the function for the first time, or when the compass is magnetically interfered.

Figure 6-5 Compass Interference

Steps

1. Call the calibration guide by the following ways.
 - When you enable compass for the first time, the compass calibration guide pops up.
 - When the compass information appears in red, select  in the menu and press  to restart calibrating compass.

2. Follow the screen instructions to move and rotate the device.

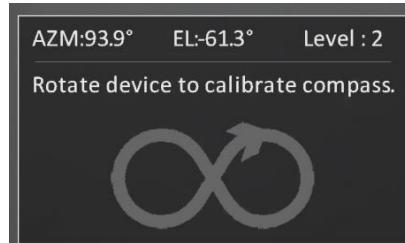

Figure 6-6 Calibrate Compass

Note

- During calibration, keep moving and rotating the device to make sure that the device faces every possible direction.
- **Level** indicates the validity of calibration. Higher level means more accurate compass reading. Calibration succeeds when **Level** turns to **3**.

3. Stop moving the device when calibration success message pops up.

Result

The direction information is displayed on the live view interface.

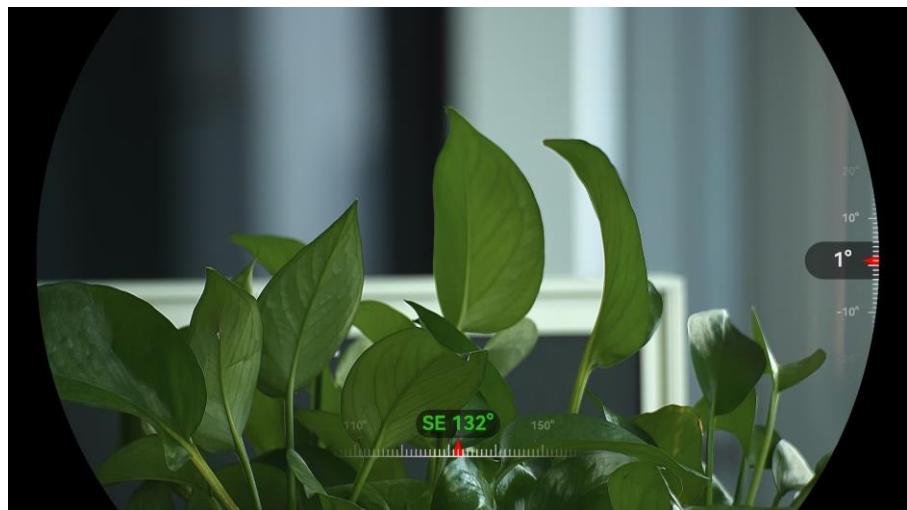

Figure 6-7 Direction Display

6.8.3

Magnetic Declination Correction

Magnetic declination is the angle variation between magnetic north and true north. Adding the magnetic declination to the compass increases the accuracy of direction reading.

Steps

1. After the compass is calibrated, go to the compass setting interface, and press \triangle or ∇ to select **Magnetic Declination**.
2. Press  to enter the setting interface, and press \triangle or ∇ to select **Quick Correction** or **Manual Correction**.
 - In quick correction, the device displays the current declination to magnetic north. Point screen center to true north and press  to confirm.
 - In manual correction, press  to select the operational symbol or number, and press \triangle or ∇ to add or subtract the declination of device location.

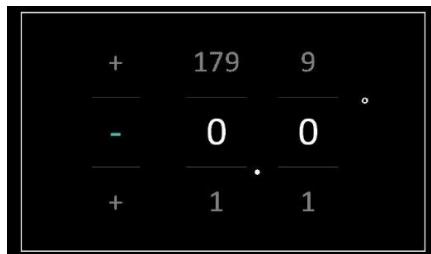

Figure 6-8 Manual Correction

3. Hold  to save and exit.

Note

It is recommended to check the local magnetic declination information on the authorized website before manually correcting the magnetic declination. The eastern magnetic declination is indicated with a positive mark (+), and the western declination is indicated with a negative mark (-).

6.9 Geographic Location Display

Equipped with satellite positioning modules, the device displays the longitude and latitude of the device on the live image, captured images, and recorded videos.

Note

- The satellite module is unable to receive signals when the device is indoor. Place the device in an empty outdoor space to receive signals.
- In the outdoors, wait for a moment for the device to display its location.

Steps

1. Hold  to show the menu.

2. Go to  **Advanced Settings**, and press \triangle or ∇ to select .

3. Press  to enable GPS. You can see the location displayed at the lower right corner of the screen.

**120° 12' 52" E
30° 12' 19" N**

Figure 6-9 Device Location Display

If the location information displays the information “Weak Signal”, it indicates the signal is weak or no signal. Please move to the open outdoor space to try again.

 **Weak Signal**

Figure 6-10 Weak Signal

7 System Settings

7.1 Adjust Date

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  to select the day, month, or year to be synchronized, and press  or  to change the number.
5. Hold  to save settings and exit.

7.2 Synchronize Time

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to switch the clock system. 24-hour and 12-hour clock are selectable. If you select 12-hour clock, press  and then press  or  to select AM or PM.
5. Press  to select the hour or minute, and press  or  to change the number.
6. Hold  to save settings and exit.

7.3 Set Language

You can select the device language in this function.

Steps

1. Hold  to show the menu.
2. Go to  Advanced Settings, and press  or  to select .
3. Press  to enter the language configuration interface.

4. Press  or  to select the language as required, and press  to confirm.
5. Hold  to save settings and exit.

7.4 Cast Device Screen to PC

The device supports casting screen to PC by UVC protocol-based client software or player. You can view the device image on the display for details.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to select **Digital**.
5. Hold  to save the settings and exit.
6. Open the UVC protocol-based client software, and connect your device to the PC via the type-C cable.

7.5 Set Unit

You can switch the unit for distance measurement.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to select the unit as needed.
5. Hold  to save settings and exit.

7.6 Set Screen Lock Passcode

You can set a passcode to lock the device screen to avoid unauthorized access to the device.

7.6.1 Enable Passcode

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enable this function and enter the configuration interface.
4. Press  to switch digit, and press  or  to change the number.
5. Hold  to save settings and exit.

Result

When passcode is enabled, you need to enter the passcode when the device is powered on or woken up from standby mode. Press  to switch digit, press  or  to change the number, and hold  to confirm.

Note

If you forget the passcode, you can hold  to reset it on the lock screen. This operation requires a factory reset to the device.

7.6.2 Change Passcode

You can change the passcode as needed when it is enabled.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to enter the configuration interface.
4. Press  or  to select , and press  to enter the configuration interface.
5. Press  to switch digit, and press  or  to change the number.
6. Hold  to save settings and exit.

7.7 View Device Information

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to view the device information such as available storage space, version, and serial No.
4. Hold  to exit.

7.8 Restore Device

This function only restores the device basic settings, such as brightness, PIP, and contrast to their defaults.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to restore the device to defaults according to the prompt.

7.9 Reset Device

This function erases all contents and settings, including basic settings, storage, passcode, and hotspot password.

Steps

1. Hold  to show the menu.
2. Go to  **Advanced Settings**, and press  or  to select .
3. Press  to restore the device to defaults according to the prompt.

8 Frequently Asked Questions

8.1 Why does the charge indicator flash improperly?

Check the following items.

- Check whether the device is charged with standard power adapter and the charging temperature is above 0 °C (32 °F).
- Charge the device in power off status.

8.2 Why is the power indicator off?

Check whether the device is off-battery. Check the indicator after charging the device for 5 minutes.

8.3 The image is not clear, how to adjust it?

Adjust the diopter adjustment ring or focus ring until the image is clear. Refer to *Adjust Device*.

8.4 Capturing or recording fails. What's the problem?

Check the following items.

- Whether the device is connected to your PC. Capturing or recording is disabled in this status.
- Whether the storage space is full.
- Whether the device is low-battery.

8.5 Why the PC cannot identify the device?

Check the following items.

- Whether the device is connected to your PC with supplied USB cable.
- If you use other USB cables, make sure the cable length is no longer than 1 m.
- Check whether the USB connection mode is switched to **USB Flash Drive**.

About this Manual

The Manual includes instructions for using and managing the Product. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. Please find the latest version of this Manual at the HIKMICRO website (www.hikmicrotech.com/).

Please use this Manual with the guidance and assistance of professionals trained in supporting the Product.

Trademarks Acknowledgement

HIKMICRO and other HIKMICRO's trademarks and logos are the properties of HIKMICRO in various jurisdictions.

Other trademarks and logos mentioned are the properties of their respective owners.

Open Source Software Declaration

This product cannot be launched without the contribution of open source software. We respect the Intellectual Property of others, have established and will continue to improve our open source compliance system. You can contact us to get this product's Open Source Software Declaration and Copyleft Source Code.

LEGAL DISCLAIMER

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THIS MANUAL AND THE PRODUCT DESCRIBED, WITH ITS HARDWARE, SOFTWARE AND FIRMWARE, ARE PROVIDED "AS IS" AND "WITH ALL FAULTS AND ERRORS". HIKMICRO MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY, SATISFACTORY QUALITY, OR FITNESS FOR A PARTICULAR PURPOSE. THE USE OF THE PRODUCT BY YOU IS AT YOUR OWN RISK. IN NO EVENT WILL HIKMICRO BE LIABLE TO YOU FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, OR INDIRECT DAMAGES, INCLUDING, AMONG OTHERS, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION,

OR LOSS OF DATA, CORRUPTION OF SYSTEMS, OR LOSS OF DOCUMENTATION, WHETHER BASED ON BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY, OR OTHERWISE, IN CONNECTION WITH THE USE OF THE PRODUCT, EVEN IF HIKMICRO HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSS.

YOU ACKNOWLEDGE THAT THE NATURE OF THE INTERNET PROVIDES FOR INHERENT SECURITY RISKS, AND HIKMICRO SHALL NOT TAKE ANY RESPONSIBILITIES FOR ABNORMAL OPERATION, PRIVACY LEAKAGE OR OTHER DAMAGES RESULTING FROM CYBER-ATTACK, HACKER ATTACK, VIRUS INFECTION, OR OTHER INTERNET SECURITY RISKS; HOWEVER, HIKMICRO WILL PROVIDE TIMELY TECHNICAL SUPPORT IF REQUIRED.

YOU AGREE TO USE THIS PRODUCT IN COMPLIANCE WITH ALL APPLICABLE LAWS, AND YOU ARE SOLELY RESPONSIBLE FOR ENSURING THAT YOUR USE CONFORMS TO THE APPLICABLE LAW. ESPECIALLY, YOU ARE RESPONSIBLE, FOR USING THIS PRODUCT IN A MANNER THAT DOES NOT INFRINGE ON THE RIGHTS OF THIRD PARTIES, INCLUDING WITHOUT LIMITATION, RIGHTS OF PUBLICITY, INTELLECTUAL PROPERTY RIGHTS, OR DATA PROTECTION AND OTHER PRIVACY RIGHTS. YOU SHALL NOT USE THIS PRODUCT FOR ILLEGAL HUNTING ANIMALS, INVASION OF PRIVACY OR ANY OTHER PURPOSE WHICH IS ILLEGAL OR DETRIMENTAL TO THE PUBLIC INTEREST. YOU SHALL NOT USE THIS PRODUCT FOR ANY PROHIBITED END-USAGES, INCLUDING THE DEVELOPMENT OR PRODUCTION OF WEAPONS OF MASS DESTRUCTION, THE DEVELOPMENT OR PRODUCTION OF CHEMICAL OR BIOLOGICAL WEAPONS, ANY ACTIVITIES IN THE CONTEXT RELATED TO ANY NUCLEAR EXPLOSIVE OR UNSAFE NUCLEAR FUEL-CYCLE, OR IN SUPPORT OF HUMAN RIGHTS ABUSES.

PLEASE FOLLOW ALL THE PROHIBITIONS AND EXCEPTIONAL CAVEATS OF ALL APPLICABLE LAWS AND REGULATIONS, IN PARTICULAR, THE LOCAL FIREARMS AND/OR HUNTING LAWS AND REGULATIONS. PLEASE ALWAYS CHECK NATIONAL PROVISIONS AND REGULATIONS BEFORE PURCHASE OR USE OF THIS PRODUCT. PLEASE NOTE THAT YOU MAY HAVE TO APPLY FOR PERMITS, CERTIFICATES, AND/OR LICENSES BEFORE ANY PURCHASING, SELLING, MARKETING AND/OR USING OF THE PRODUCT. HIKMICRO SHALL NOT BE LIABLE FOR ANY SUCH ILLEGAL OR IMPROPER PURCHASING, SELLING, MARKETING, AND END USES AND ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, OR INDIRECT DAMAGES ARISING THEREOF.

IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATTER PREVAILS.

Regulatory Information

These clauses apply only to the products bearing the corresponding mark or information.

EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the Directive 2014/30/EU (EMCD), Directive 2014/35/EU (LVD), Directive 2011/65/EU (RoHS), Directive 2014/53/EU.

Hereby, Hangzhou Microimage Software Co., Ltd. declares that this device (refer to the label) is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address:

<https://www.hikmicrotech.com/en/support/download-center/declaration-of-conformity/>

Frequency Bands and Power (for CE)

The frequency bands and transmitting power (radiated and/or conducted) nominal limits applicable to the following radio equipment are as follows:

Wi-Fi 2.4 GHz (2.4 GHz to 2.4835 GHz), 20 dBm

5 GHz (5.15 GHz to 5.25 GHz): 23 dBm

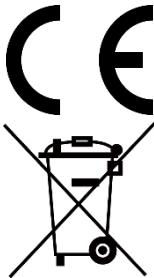

5.15~5.25 GHz 屋内使用のみ。

For the device without a supplied power adapter, use the power adapter provided by a qualified manufacturer. Refer to the product specification for detailed power requirements.

For the device without a supplied battery, use the battery provided by a qualified manufacturer. Refer to the product specification for detailed battery requirements.

Directive 2012/19/EU (WEEE Directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at

designated collection points. For more information see: www.recyclethis.info

Regulation (EU) 2023/1542 (Battery Regulation): This product contains a battery and it is in conformity with the Regulation (EU) 2023/1542. The battery cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), or lead (Pb). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info.

KC

B 급 기기: 이 기기는 가정용(B 급) 전자파적합기기로써 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.

INFORMATIONEN FÜR PRIVATE HAUSHALTE

1. Getrennte Erfassung von Altgeräten:

Elektro- und Elektronikgeräte, die zu Abfall geworden sind, werden als Altgeräte bezeichnet. Besitzer von Altgeräten haben diese einer vom unsortierten Siedlungsabfall getrennten Erfassung zuzuführen. Altgeräte gehören insbesondere nicht in den Hausmüll, sondern in spezielle Sammel- und Rückgabesysteme.

2. Batterien und Akkus sowie Lampen:

Besitzer von Altgeräten haben Altbatterien und Altakkumulatoren, die nicht vom Altgerät umschlossen sind, die zerstörungsfrei aus dem Altgerät entnommen werden können, im Regelfall vor der Abgabe an einer Erfassungsstelle vom Altgerät zu trennen. Dies gilt nicht, soweit Altgeräte einer Vorbereitung zur Wiederverwendung unter Beteiligung eines öffentlich-rechtlichen Entsorgungsträgers zugeführt werden.

3. Möglichkeiten der Rückgabe von Altgeräten:

Besitzer von Altgeräten aus privaten Haushalten können diese bei den Sammelstellen der öffentlich-rechtlichen Entsorgungsträger oder bei den von Herstellern oder Vertreibern im Sinne des ElektroG eingerichteten Rücknahmestellen unentgeltlich abgeben. Rücknahmepflichtig sind Geschäfte mit einer Verkaufsfläche von mindestens 400 m² für Elektro- und Elektronikgeräte sowie diejenigen Lebensmittelgeschäfte mit einer Gesamtverkaufsfläche von mindestens 800 m², die mehrmals pro Jahr oder dauerhaft Elektro- und Elektronikgeräte anbieten und auf dem Markt

bereitstellen. Dies gilt auch bei Vertrieb unter Verwendung von Fernkommunikationsmitteln, wenn die Lager- und Versandflächen für Elektro- und Elektronikgeräte mindestens 400 m² betragen oder die gesamten Lager- und Versandflächen mindestens 800 m² betragen. Vertreiber haben die Rücknahme grundsätzlich durch geeignete Rückgabemöglichkeiten in zumutbarer Entfernung zum jeweiligen Endnutzer zu gewährleisten. Die Möglichkeit der unentgeltlichen Rückgabe eines Altgerätes besteht bei rücknahmepflichtigen Vertreibern unter anderem dann, wenn ein neues gleichartiges Gerät, das im Wesentlichen die gleichen Funktionen erfüllt, an einen Endnutzer abgegeben wird.

4. Datenschutz-Hinweis:

Altgeräte enthalten häufig sensible personenbezogene Daten. Dies gilt insbesondere für Geräte der Informations- und Telekommunikationstechnik wie Computer und Smartphones. Bitte beachten Sie in Ihrem eigenen Interesse, dass für die Löschung der Daten auf den zu entsorgenden Altgeräten jeder Endnutzer selbst verantwortlich ist.

5. Bedeutung des Symbols „durchgestrichene Mülltonne“:

Das auf Elektro- und Elektronikgeräten regelmäßig abgebildete Symbol einer durchgestrichenen Mülltonne weist darauf hin, dass das jeweilige Gerät am Ende seiner Lebensdauer getrennt vom unsortierten Siedlungsabfall zu erfassen ist.

Symbol Conventions

The symbols that may be found in this document are defined as follows.

Symbol	Description
 Note	Provides additional information to emphasize or supplement important points of the main text.
 Caution	Indicates a potentially hazardous situation, which if not avoided, could result in equipment damage, data loss, performance degradation, or unexpected results.
 Danger	Indicates a hazard with a high level of risk, which if not avoided, will result in death or serious injury.

Safety Instruction

These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss. Please read all the safety information carefully before using.

Transportation

- Keep the device in original or similar packaging while transporting it.
- Keep all wrappers after unpacking them for future use. In case of any failure occurred, you need to return the device to the factory with the original wrapper. Transportation without the original wrapper may result in damage on the device and the company shall not take any responsibilities.
- Do not drop the product or subject it to physical shock. Keep the device away from magnetic interference.

Power Supply

- If a power adapter is provided in the device package, use the provided adapter only. If no power adapter is provided, ensure the power adapter or other power supply complies with Limited Power Source. Refer to the product label for the power supply output parameters.
- Make sure the plug is properly connected to the power socket.
- DO NOT connect multiple devices to one power adapter, to avoid overheating or fire hazards caused by overload.
- The power delivered by the charger must be between min. 5 Watts required by the radio equipment, and max. 10 Watts in order to achieve the maximum charging speed.

Battery

- The external rechargeable battery type is 18650, and the battery size should be 19 mm × 70 mm. The rated voltage is 3.6 VDC, and the battery capacity is 3300 mAh.
- Make sure the battery temperature is between 0°C to 55°C (32°F to 131°F) when charging.
- For long-term storage of the battery, make sure it is fully charged every 3 months to ensure the battery quality. Otherwise, damage may occur.
- CAUTION: Risk of explosion if the battery is replaced by an incorrect type.
- The purchased batteries by users need to comply with the relevant international standards about battery safety (e.g. EN/IEC standards).
- The built-in battery cannot be dismantled. Please contact the

manufacture for repair if necessary.

- **CAUTION:** Risk of explosion if the battery is replaced by an incorrect type. Replace with the same or equivalent type only.
- Batteries of improper size cannot be installed, and may cause abnormal shutdown.
- Improper replacement of the battery with an incorrect type may defeat a safeguard (for example, in the case of some lithium battery types).
- Do not dispose of the battery into fire or a hot oven, or mechanically crush or cut the battery, which may result in an explosion.
- Do not leave the battery in an extremely high temperature surrounding environment, which may result in an explosion or the leakage of flammable liquid or gas.
- Do not subject the battery to extremely low air pressure, which may result in an explosion or the leakage of flammable liquid or gas.
- Dispose of used batteries according to the instructions.
- Confirm there is no flammable material within 2 m of the charger during charging.
- **DO NOT** place the battery in the reach of children.
- **DO NOT** swallow the battery to avoid chemical burns.
- This product contains a coin/button cell battery. If the coin/button cell battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death.
- If the battery compartment does not close securely, stop using the product and keep it away from children.
- If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.
- This device is not suitable for use in locations where children are likely to be present.
- **DO NOT** place the device with battery or the battery alone near heating or fire source. Avoid direct sunlight.
- **CAUTION:** Risks of short circuit, fire, or explosion if the battery is damaged. Frequent use, dropping, impact, corrosion, or compression of the battery may cause damages including cracked casing, detached plates, or leakage of internal liquid or gas, etc.
- If the battery is damaged, stop using it immediately and dispose of it according to the instructions.

Maintenance

- If the product does not work properly, please contact your dealer or the nearest service center. We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.
- Make sure that the power has been disconnected before device

teardown and repair by professionals.

- If the equipment is used in a manner not specified by the manufacturer, the protection provided by the device may be impaired.
- This equipment is not suitable for use in locations where children are likely to be present.
- Check the optical surfaces of objective lens, eyepiece, rangefinder, etc. If necessary, remove dust and sand from the optics using tools and solvent designed especially for this purpose (it is preferable to use a non-contact method).
- Wipe the exterior surfaces of metal, plastic, and silicone parts with a clean and soft cloth. Do not use chemically active substances, solvents, etc. as these may damage the paint.
- Clean the electrical contacts of the removable battery on the device using a non-greasy organic solvent.

Using Environment

- Make sure the running environment meets the requirement of the device. The operating temperature shall be -30 °C to 55 °C (-22 °F to 131 °F), and the operating humidity shall be from 5% to 95%.
- DO NOT expose the device to high electromagnetic radiation or dusty environments.
- DO NOT aim the screen at the sun or any other bright light.
- Place the device in a dry and well-ventilated environment.
- Avoid equipment installation on vibratory surface or places subject to shock (neglect may cause equipment damage).

Emergency

If smoke, odor, or noise arises from the device, immediately turn off the power, unplug the power cable, and contact the service center.

Laser

When any laser equipment is in use, make sure that the device lens is not exposed to the laser beam, or it may burn out. The laser radiation emitted from the device can cause eye injuries, burning of skin or inflammable substances. Before enabling the laser ranging function, make sure no human or inflammable substances are in front of the laser lens. Do not place the device where minors can fetch it. According to IEC 60825-

1:2014, EN 60825-1:2014+A11:2021, and EN 50689:2021, this laser product is classified as Class 1 laser product and consumer laser product.

Limited Warranty

Scan the QR code for the product warranty policy.

Manufacture Address

Room 313, Unit B, Building 2, 399 Danfeng Road, Xixing Subdistrict, Binjiang District, Hangzhou, Zhejiang 310052, China

Hangzhou Microimage Software Co., Ltd.

COMPLIANCE NOTICE: The thermal series products might be subject to export controls in various countries or regions, including without limitation, the United States, European Union, United Kingdom and/or other member countries of the Wassenaar Arrangement. Please consult your professional legal or compliance expert or local government authorities for any necessary export license requirements if you intend to transfer, export, re-export the thermal series products between different countries.
